

# The Lacombe Guardian

VOL. I. No. 26

LACOMBE, ALBERTA, FRIDAY, NOVEMBER 21, 1913

\$1.00 PER YEAR

## Very Good Prospect for Gas

The Lacombe Brick, Tile & Cement Company has located over a section of the most promising oil and gas land in the district, and through its solicitor, A. M. MacDonald, has applied to the town council for a franchise.

The company is going at it in a business like manner, having called in for consultation Mr. A. J. McGuire, an experienced mining engineer and gas expert, who after a thorough inspection of the district expresses the opinion that gas can be had for the drilling, and that it can be found within six hundred feet. He further states that the cost of the drilling should not exceed \$5.00 per foot.

A general meeting of the company has been called for next Wednesday evening in the town hall. At this meeting Mr. Martin, of Medicine Hat, the leading gas expert of Alberta, will be in attendance. Mr. Martin will arrive on Tuesday and will have ample time to thoroughly look over the district before the meeting, so that a very full report may be expected of the gas possibilities of the district.

If gas can be obtained, as now seems a practical certainty, it will be a splendid thing for the Lacombe Company, as well as for the town and district. It would be a paying thing for the company if it went no further than to supply fuel for their mills.

## Lacombe Assembly Club

A general meeting of the Lacombe Assembly Club was held in the town hall on Thursday evening for the purpose of completing organization and making final arrangements for the season's assemblies.

Officers were elected as follows: President, Dr. Simpson; secretary, A. J. Cameron; treasurer, J. C. Carroll; stewards, J. G. Nickerson, P. C. Owen, E. J. Schuitzer.

Patronesses were chosen as follows: Mrs. (Dr.) Simpson, Mrs. J. W. Fortune, Mrs. A. M. Campbell, Mrs. E. J. Tott, Mrs. H. A. Day, Mrs. J. T. Parker, Mrs. C. Watling, Mrs. C. B. Halpin, Mrs. John McKeenty, Mrs. A. S. Stewart, Mrs. A. Urquhart, Mrs. W. N. Morrison.

It was decided to hold regular assemblies on the following dates: November 28, December 18, January 8, January 29, February 12, February 26.

The original intention had been to secure a home orchestra to furnish the music, but the membership committee reported finding so strong a demand for Lynch's orchestra that it was decided to engage this orchestra for the season.

The club has now a membership of about forty, with several more in prospect, which insures the best season in the club's history.

## Local Jottings

The skating rink has been flood out this week.

For the choicest fruit go to the Lacombe Candy Kitchen.

Mr. and Mrs. S. W. Paisley are leaving shortly for a trip to Ontario.

Special bargains in ladies' ready to wear garments at The Leading Store.

See the fine Range of broad moire and corded and plain velvets at The Leading Store.

The members of the Eastern Star lodge spent a very enjoyable social evening at the home of Mrs. Titworth on Tuesday evening.

Mrs. S. L. Roemer, returned on Monday, from a two weeks holiday; spent with her daughter, who is teaching school in Stettin District.

While southern Alberta has six inches of snow and wintry weather to match this week, the Lacombe district remains without snow, and with the exception of two frosty nights Indian summer weather has prevailed.

The Old Timers' Association held a meeting in the town hall on Friday evening at which it was decided to have a ball for their annual celebration this year, to take place between Christmas and New Year's. A committee was appointed as follows, to arrange for the ball: John Barnett, W. L. Elliott, Sam Watt, J. L. Storey, Bob Gibson, B. F. Allison, John Dauron.

## Mexico Holds Great Britain a Friend

Mexico City, Nov. 19.—Speculation as to what President Wilson intends to do in the face of the Mexican difficulty was increased today by the knowledge that the American charge d'affaires, Nelson O'Shaughnessy, has received new instructions from Washington to wait at his post for further instructions, and that important matters were under consideration. The announcement that a British squadron was coming to Mexican waters created keen interest, but the effect on the Mexican mind was reassuring rather than otherwise, because the Mexican people continue to look upon Great Britain as a friend. In official quarters the despatch of the squadron was styled as an act of courtesy.

Washington, Nov. 19.—Two events connected with the military and naval situation in regard to Mexico today gave a faint tinge of interest to a day that was otherwise unmarked by developments. Early in the day General Bliss, commanding the American troops on the Mexican border, was authorized to detain indefinitely the Second Cavalry regiment at Fort Bliss, and the Fifth at Fort Huachuca which were to have come north as soon as they were relieved by the two regiments recently sent to Texas for that purpose.

## Cruiser Squadron Is Sent to Mexico

Bridgeport, Barbadoes, Nov. 19.—The British cruiser squadron in West Indian waters last night received permanent orders to proceed to Vera Cruz and the vessels sailed at midnight.

The British squadron consists of three armored cruisers, Suffolk, Lancaster and Berwick and is commanded by Rear Admiral Sir Christopher Cradock. His flagship is the Suffolk. The three cruisers are of the same type, displacing 18,000 tons each. They even carry an armament of 14, six pounders; eight, twelve pounders, and three, three pounder guns.

London, Nov. 19.—Great Britain decided to send the warships to Mexican waters from Barbadoes in order to protect British subjects, should the necessity arise. The decision was arrived at by the British foreign office, as a result of the general news published in the press of the United States of the unsatisfactory conditions prevailing in Mexico and of the advance of the Constitutionalists in the vicinity of the Vera Cruz railway.

No special information has been received by the government here of any danger to its citizens and it based its change of policy upon the accounts published in English newspapers from American sources.

Bridgetown, Barbadoes, Nov. 19.—When the British cruiser Suffolk, Lancaster and Berwick arrive at Vera Cruz, a very powerful fleet of warships will be assembled in the Mexican gulf. The American battleships Louisiana, Michigan and New Hampshire, the cruiser Tacoma, the gunboat Wheeling and the scout cruiser Chester, the German cruisers Bremen and Hertha, and the French armored cruiser Conde are all gathered there.

On the Pacific coast of Mexico are the American armored cruisers California, Maryland and Pittsburgh and the gunboat Annapolis and the German cruiser Nuremberg, while the Japanese cruiser Izumo is on the way there.

## To Grow Wheat in Factories

London, Nov. 20.—A Welsh chemist named Williams is maturing an idea of growing wheat in factories, thereby reducing the cost of a loaf of bread to one-quarter the present price. It is claimed that the scheme, if workable, will revolutionize the markets. Williams asserts that he has discovered a method of specially treating the soil he will use in the plant by electricity and a secret solution which will force growth.

The Daily News says that Williams proposes a factory of several floors covered with sand and gravel, impregnated with anitrate solution. Wires and tubes will supply radiated electricity, affording heat and light, and it is expected to harvest six crops a year, at a cost of a shilling a bushel.

## Hands Across the Sea

Not a volume of The Youth's Companion is published that does not contain a number of contributions by British contributors.—Mr. Gladstone, the Duchess of Sutherland, Rudyard Kipling, Lord Tennyson have in years past written for this great family paper.

During 1914 the Duke of Argyll, formerly Governor General of Canada, will have something to say about "The Scot"—his character and characteristics; Jane Barlow will tell of the "Big Houses of Ireland"; Sir Ernest Shackleton will describe the quantities which lead to success in an explorer; Sir William Ramsay, the great chemist, will write upon "Waste, and How to Remedy It"; Sir John Murray will tell about "The Deepest Parts of the Sea"; Dr. C. W. Saleeby, eminent English physician, will describe "The Beauty That Endures."

This tells very little of what The Companion will bring its readers in 1914. As it is today, The Companion is as entertaining as you may remember it. But it is larger now, with special Family Pages, Boys' Pages, Girls' Pages. There are fifty-two issues in a year, not twelve.

If you do not know The Companion as it is today, let us send you sample copies containing chapters from Frank Lillie Pollock's great Canadian serial, "The Timber Treasure," with the Announcement for 1914.

Every new subscriber for 1914 in Canada will receive free all the issues for the remaining weeks of 1913—from time of subscription until January, 1915—all for \$2.25.

THE YOUTH'S COMPANION  
144 Berkeley St., Boston, Mass.  
New Subscriptions Received at this Office.

## German Bachelors "in Dutch"

Berlin, Nov. 20.—"Single blessedness" is gradually coming to be looked on as a luxury, which must be made to contribute handsomely to the public revenue. A bill which has been drawn up by a commission of the Luback Senate proposes that unmarried persons who do not contribute to the maintenance of relatives shall pay 10 per cent. additional income tax when they are assessed between \$500 and \$2,500 annually, and 20 per cent. more when their receipts exceed the latter figure. Widows and widowers who spend nothing on the maintenance of relations, shall pay an additional 10 per cent. if their incomes exceed \$2,500.

A fiscal curiosity of the opposite tendency is a municipal tax of 37 cents on perambulators, which obtains in the town of Spandau. Though nominally the tax price of the metal ticket entitling the holder to have his children wheeled on the footpaths, this impost has during the last five years yielded the municipal treasury a profit of over \$2,500.

## Some Family, This

Parkerburg, W. Va., Nov. 19.—A rugged and grizzled old mountaineer, John White, accompanied by his wife, six pairs of twins and a set of triplets, reached this city on foot in search of work. The mountaineer with part of his family had walked many miles to this city because, as he said: "The railroads are mighty expensive to travel on and I reckon my wife and the youngsters could do tolerable well on foot, being as they had never known much about any other way of gittin' over the country."

Hale and hearty, White and his wife were unconcerned over the future. When questioned about the large family he had brought along with him White merely snorted and said: "Huh, this yer ain't all of em. We've got three other pairs of twins and another set of triplets back in our place in the mountains of Calhoun County. We left our oldest boys and girls at home to run the old farm. The family was getting a bit too big, and we decided to come down into the city and get something to do. I reckon we ought to be able to make a living down here. I've got some husky boys here with me and some hard working gals."

According to White all his children came in doubles or triplets. He said it didn't much matter so long as they were hearty and strong, and in that he had been fortunate, as only one set of triplets had died.

White reckoned he would sell the old mountain farm as soon as he got his family settled away and could find work for the sons he had left in the mountains.

## New Fuel for Motor Cars

London, Nov. 20.—Recent practical tests carried out by the Royal Automobile Club have revealed that a new fuel of the highest grade for motors and internal combustion engines has come to light.

The report says that a 15-h. p. Straker-Squire car was run upon the club's standard routes a distance of 1,000 miles, first on a well known brand of petrol costing 48 cents a gallon retail, and afterwards, without any alteration of the carburetter, a further 1,000 miles on economin, as the new fuel is called. The conditions for each 1,000 miles were similar, except that the weather was finer and the roads slightly better during the run with petrol. This notwithstanding, the results in regard to speed and consumption were slightly in favor of the new spirit, which likewise produces much less carbon deposit. 32.4 grains, as against 53.4 in the case of petrol.

A point of considerable importance, too, as regards safety, is that economin has a higher flashpoint than petrol. The spirit is obtained by process of admixture of crude petroleum, kerosene, shale oils, naphtha, tar oils and other hydro carbons, with a proportion of rosin and other chemicals. It is said to be clean and odorless, and less inflammable than petrol for dry cleaning and other purposes; and the process is claimed to yield at least 80 per cent. of the petroleum and other ingredients employed.

It is proposed to erect a plant in London to produce 20,000,000 gallons of economin annually, and this is to be sold retail at 31 or 33 cents a gallon. It is a German invention.

## Interurban Railway News

Edmonton Nov. 20. Mr. J. C. Gibson, of the firm of Gibson, Taylor and Strathy, financial brokers, Toronto, was in Edmonton yesterday on a short visit after completing a tour of inspection over the territory to be covered by the Blindman Valley Railway, between Lacombe and Gull Lake. Mr. Gibson was accompanied by O. Inkster, consulting engineer for the firm in the construction of this railway.

This new road is to be in a finished condition by next fall, in plenty of time to aid in the moving of the crops from the rich and fertile farming country enclosed by this valley. The line will extend from Lacombe to Rimbey, a distance of 35 miles.

Owing to the increasing importance of the Gull Lake country as a popular summer resort, as well as a district rich in good farms, unusual local interest has been aroused in the new enterprise, the farmers even lending their own teams to assist with the grading. A good deal of the stock is also being bought up by the farmers along the line of the new railway. At the present time the grading has been completed as far as six miles west of Lacombe, and orders have been placed for steel and rolling stock.

The new railroad will be peculiar in some respects, having a few features all its own. It is to have a standard gauge, and consequently will be able to feed the C. P. R. line between Edmonton and Calgary. The freight cars are to be supplied by the C. P. R.

But as to the locomotives and passenger traffic, the Blindman Valley railway leaves the beaten path. The engines are to be of the Hele-Shaw oil transmission type and will be used solely for the purpose of hauling freight. The passenger traffic is to be carried in cars very much after the pattern used on the Edmonton Interurban railway, a type of car which carries its own power in the shape of a gasoline motor. This type of car has been chosen as being especially well adapted to the short haul tourist traffic which is bound to increase as soon as transportation is made more comfortable between Edmonton and Gull Lake.—Daily Capital.

## Drowning Caused by Treacherous Ice

Moose Jaw, Nov. 16.—Treacherous ice, due to a chinook which blew all last night and this morning, claimed the death of two boys in the river this afternoon. Tom Wright, aged 16, and Willie Hunter, aged 13, were the victims. With three others, including Hunter's brother, they were skating when without warning the ice gave way. The drowned lad, Hunter, had pulled his brother out to safety before he himself went in and to his death. Another lad, named Davidson, one of the five, pulled his coat off and made a brave and successful attempt to rescue the other Hunter boy, who had fallen in for the second time.

## IMMENSE WASTE OF MONEY AND WORK

The first really big piece of work undertaken by the present government was the carrying on of the Hudson Bay Railway and Steamship route which was started by the late Liberal government. It was for a long time the fashion amongst Tories to criticize the Liberals for proceeding slowly and carefully with this vast scheme, which will involve the expenditure of many millions of dollars on a route over land and sea of which little is definitely known. Apparently now the government is being forced to realize that "Fools rush in where angels fear to tread." The stories of mismanagement and worse coming in from Port Nelson are astounding in their revelations of criminal folly.

The Borden government first selected Port Nelson for the port of the Hudson Bay terminal. The chief point in its favor appeared to be that it is on low-lying ground at the mouth of the Nelson River, with shoal water extending so far that at present it is stated vessels drawing more than 14 feet of water cannot get within seven miles of the "harbour," while the silt from the river is so great that no matter how the harbor may be dredged it will constantly fill up again. Fort Churchill having deep anchorage close to shore was naturally neglected.

The government sent some 150 men to prepare this port, and then sent a number of vessels with supplies. To prove that he was a business minister, Hon. Mr. Cochrane neglected to send any means of unloading these vessels, which, although small ships, could not get anywhere near the port. One vessel, loaded, at a cost of \$60,000 was compelled to bring its cargo of lumber back to North Sydney, after pitching a lot of it into Hudson's Bay, while four other vessels sent up at enormous cost had to bring their cargoes back again.

A costly dredge sent up to help clean the harbour was to have been beached on the sand for the winter. Accordingly at high tide it was run onto jagged rocks, and broke to pieces with the loss of its valuable machinery when the tide went out. So little preparation was made for taking care of the men during the Arctic winter that most of them broke their contracts and sacrificed their pay rather than face the rigors imposed upon them by the government.

The whole history of the thing is marked by waste and incompetence and every indication of this having been perpetrated for "political purposes."

The Ottawa Citizen (Cons.) discussing this says an engineer is making super-human efforts to establish order out of chaos at Port Nelson and continues: "Beach-combers, recruited in political machine fashion are sent up as laborers, only to return by the next boat. Skilled help is appointed through political pressure. Contracts for material pass through the political machine. Over all the lack of information and system, no one is responsible for anything."

This last is not correct. The government, and especially Hon. Mr. Cochrane must be held responsible by the people. Instead of spending between \$50,000 and \$100,000 on a partisan investiga-

tion of the N. T. R., with the hope of injuring the Liberal party, it would pay the government better to do what the Liberals did with the N. T. R.—abstract politics and apply proper business methods. The captain of "Ceres," wrecked at Port Nelson, is practically defying the government to investigate the wreck, and expose the real conditions at Port Nelson. Some day the whole matter will be investigated and then the people will realize the cynicism of Mr. Borden's promises of clean and honest administration.

## RECKLESS EXTRAVAGANCE

It is gleefully announced by the Department of Public Works that under Hon. Mr. Rogers' administration during the last fiscal year no less than \$18,844,222 of the public money has been spent on public works. During the first six months of the present year the ordinary expenditure by the Department of Public Works was \$8,067,105, and the expenditure on Capital account \$14,291,055, a total of \$22,358,160.

In the year ending March 31, 1911, the last full year of Liberal administration, only \$5,621,431 was spent on ordinary public works, or, including money spent on Capital account, a gross expenditure of \$12,364,048.

The expenditure during the past year was much more than twice the amount spent by the Liberals two years previously on ordinary account, and fifty per cent greater than their total expenditure.

During the first half of the present year, the ordinary expenditures on Public works were greater than during the whole of the last year of Liberal administration, while the expenditures on Capital Accounts during the same six months exceeded those of the whole of the last Liberal year by more than two million dollars.

The needs of the Dominion were amply satisfied in 1911. These needs cannot have multiplied more than twice over in two years. It is clear that the Public Works Department under Mr. Rogers is displaying even greater extravagance than Col. Sam Hughes and his Militia Department. Such lavish expenditure cannot be in the interests of the people. The only other assumption is that it is intended to entrench the government in power and enhance the prestige of the "Minister of Elections" by bribing the people with their own money.

## THE TARIFF DILEMMA.

For some time after the new American tariff went into effect Conservative papers tried to meet the demand for free wheat and flour so as to secure free entrance for these products into U. S. markets by declaring they can get in free anyway under the provisions of the Underwood Law. A few days ago, Secretary Hamlin of the U. S. Treasury made the following ruling: "Wheat and wheat flour will not be admitted free to the U. S. from those countries which decline to admit free of duty similar products from the U. S." And the trouble is that the interests which control the Borden government are afraid that once the Canadian people are given a taste of free food-stuffs they will redouble their support to the Liberal demand of general tariff reduction.

## LESSONS ON THE BY-ELECTIONS

Ample evidence is given in the result of the three by-elections this fall that the wave of excitement which carried the Borden government into office has spent its force. It is clear that even in Ontario, which in 1911 was the favored home of Bordenism, with calm reflection has come reaction towards Liberalism and sane government. The net result of the three by-elections has left the parliamentary representation of the two parties unaltered, but it has left the Borden government with a considerably reduced popular vote.

In Chateauguay the government turned the Liberal majority of 40 into a Conservative plurality of 145. This victory, however, was achieved by such openly corrupt methods that ever since then the government workers have been doing everything possible to cover up their tracks in preparation for the protest which they know must meet their candidates if the full facts are brought to light.

In East Middlesex the government majority was reduced from 661 to 388 in the very heart of Ontario in a by-election whose result was so conceded that the Liberals did not extend themselves.

In South Bruce the Conservative majority of 103 in 1911 was converted into a Liberal majority of 115, which means that 109 voters who marked their ballots for the Conservatives in 1911 have now turned their allegiance to the Liberal cause.

The net result of the three elections is that 111 electors who voted for the Borden government in 1911 have now become convinced that the Liberal policy is the best for Canada, and voted accordingly.

The real result of the by-elections is to show that the Borden government no longer represents the opinion of the people of Canada. The turn over indicated in two typical Ontario Conservative ridings, as reflected throughout the country, as it undoubtedly is, would at the general election convert the present government majority into an immense minority.

## WHERE INVESTIGATION IS NEEDED

Mr. G. T. Ferguson, K. C., of Winnipeg, who has been engaged for a long time at \$50 a day by the Borden government to investigate the alienation of the public domain since 1896, in the hope of being able to find some justification for the reckless charges flung around by the Tories previous to September 1911, has returned to Ottawa to look up Western grazing leases. It would interest a number of people around Winnipeg if Mr. Ferguson would come a little closer to date and start an investigation into the efforts of the Hon. Dr. Roche and Hon. Robert Rogers last year to slice two townships out of this Riding Mountain forest reserve to present them as grazing lands to political friends. Mr. Ferguson might then show how this deal was stopped by the activity of the Liberal Opposition in parliament.

## FIRE PREVENTION

Manufacturers Take up a Worthwhile Cause—Excessive Waste in Canada From Fire

The Canadian Manufacturers' Association is continuing its propaganda for fire prevention, which was organized a few months ago. The following timely paragraph is circulated by the Secretary of the new movement: "It is an open question whether the careless fool or the deliberate criminal does more damage by fire. Advantage seems to lie with the fool, because he is everywhere, already bringing down destruction, while the fire bug must go about his deadly work stealthily, at weird hours and in awkward places. Chief among the fools who carelessly cause fires is the smoker. His blazing match is cast down still alight. His cigarette end falls into piles of paper or shavings. The burning lathes of his trusty pipe descend gently into oil vats and barrels of powder. If the fool destroyed only himself, the world could bear his actions philosophically. But he usually escapes while better men perish. In England great wealth was accumulated by a man who was shrewd enough to locate small tobacco stores opposite factory entrances, but his fortune represented the loss of many fortunes by his brother smoke factories. One would think that the smoker would hesitate to light his weed in the neighborhood of explosive liquids, but a recent report of the National Fire Protection Association of the United States shows that, out of 1,600 fires occurring in places where benzol, gasoline and naphtha were stored, 30 were caused by the smoker and 135 by matches, the smoker's friends. Smoking should be absolutely prohibited in or about every Canadian factory, and employees violating the rule should be dismissed. If the rule became national, manufacturers could inform each other of these dismissals and could refuse employment to persistent offenders. If it were enforced there would be fewer fires, better work would be done, and the smoker would enjoy his weed more keenly in the evening, after a day's self-denial."

If we changed the word "factory" to "shop," "house" or "stable" the article has a meaning for us all.

## FOR MIXED FARMING

What a Prominent Farm Editor Says of the Canadian West

Mr. A. D. Penny, editor of "Farm Life," Chicago, writes his impressions of the Canadian West as follows:

"Mixed Farming Chances." "While grain raising, the life to ear, wheat raising, will probably remain a long time to come, the chief product of Canadian farms, nevertheless, I was most favorably impressed with the opportunities open to the man who engaged in mixed farming and stock raising. I believe that with the possibilities for economical meat production, which this country appears to possess, the greater profits will be found in beef and pork production and dairying. The risk will be found much less and the returns much more than in grain farming. In the districts surrounding the towns of Dauphin, Humboldt, Prince Albert, Vermilion, North Battleford and Edmonton, we found conditions were adapted to stock raising and general farming. The natural browse grass and western rye grass make great growth here and provide economical feed in abundance. Timothy grows well and alfalfa is being experimented with, with good results. In fact, in the first two weeks of August we found pastures as green and as luxuriant as June meadows in the States. Hay is plentiful throughout this section and stock is finished on ground barley, oats or frosted wheat."

The development of stock raising is up to its infancy here, nevertheless farmers are beginning in a small way and have already demonstrated that this line of farming brings in the most satisfactory returns in the long run. What is more, these farmers are building for the future and are laying the foundations for a permanent and progressive agriculture."

Good Vegetables Seen: "I was greatly interested in the vegetable gardens found growing throughout Western Canada. Most of the common vegetables grow and flourish abundantly. With the exception of the tomato and sweet corn, common vegetables reach maturity. We saw cabbages, cucumbers, radishes, lettuce, pumpkins and squash equal to those grown in the States. Tomatoes were well and we found strawberry patches which had just ceased bearing on our arrival."

There will be an ever increasing demand for the various products mentioned by Mr. Penny in the rapidly

developing industrial centres of the West, such as Winnipeg, Calgary, Medicine Hat and numerous others.

## MACHIAVELLIAN McBRIDE

Sir Richard McBride at a recent Ottawa Canadian Club banquet broke all rules of decency and courtesy in order to advertise his allegiance to the Borden Naval contribution idea. Sir Richard was not over thus, but it took him longer to turn a back somersault from the unanimous position of 1900 than such agile politicians as Premier Borden and Hon. Mr. Foster.

In a speech at Vancouver on August 9th, 1912, Premier Sir Richard McBride of British Columbia said: "Here we have the responsibility of guarding the portals of the Dominion, and we should be all the readier to show that we realize the responsibility in this regard and our readiness to act if need rises. There are even now being erected or proposed costly railway terminals and big industries will follow these. Factories and ware-houses are springing up. If we propose to secure the safety of these tremendous investments we must be sure of adequate naval strength."

The same responsibility exists to day of guarding the Western portals of the Dominion. The same necessity for protecting the tremendous investments on the British Columbia coast exists to day. By what species of political legerdemain did Premier Borden induce his picturesque follower from the Pacific coast to swallow his opinions and common sense in order to join the "Canada Can't" contribution crowd?

## OPPORTUNITIES IN AGRICULTURE

There is no profession today which offers such great inducements to young men as farming. We are beginning to realize this fact more and more as our great country is becoming more thickly settled, and the call for all kinds of farm produce becomes more urgent. Yet, with this great field opening up for the producer, there still exists the erroneous impression that the city offers more advantages to the young man.

Everything we eat and wear comes out of the soil. Practically all business enterprises in our western cities hinge on the produce of the farm. This then, is the day of the agriculturist, and his era of opportunity.

Luther Burbank, doubtless the most qualified man in the world to make such a statement, says that the greatest opportunity for our boys and young men is in agriculture. He shows that after the young man has spent eight years at hard study of medicine, law or engineering, he has not made a success; he is only prepared to commence the battle for it, in greatly overworked fields. The farmer, on the other hand, is producing from the first day he turns a sod on his farm. He is the real factor today upon which the increase of the nation's wealth depends.

"If one kernel of corn," said Mr. Burbank, "were added to each ear grown in this country annually, it would increase the supply by five million bushels. One improvement in the potato is already paying back seventeen million dollars a year. What the world urgently needs, and now, is

men who can increase the forage from our present acreage so that sixteen cents will buy a pound of the choicest alfalfa, as of old, instead of a pound of rump, as now."

This sane philosophy, coming as it does from the greatest plan breeder in America, must command the attention of all people who are interested in the future of the country. The cost of living has increased 58 per cent. in 15 years, and when we consider that less than half our population is producing from the original store—the soil—we can readily see how agriculture offers a great field to the young man of today. The profession holds out to men inducements which are unequalled in other spheres; it is independent and lucrative, calling forth all the faculties which we possess and rendering a more rapid recompense for our labor than the vast majority of trades, callings or professions.

How You Would Enjoy

some of these delicious lamb chops, or one of these big, juicy steaks, if you only came here and saw them. Really, you would not deny yourself such splendid cuts. They look so good, fresh and tasty, and they actually are the finest to be had in this section or anywhere.

In the matter of the Estate of The Lacombe Drug Company, Limited, Insolvent.

Notice is hereby given that the above named insolvent, The Lacombe Drug Co., Ltd., of the Town of Lacombe, in the Province of Alberta, has made an assignment of its estate and effects to The Trusts and Guarantee Company, Limited, Official Assignee, for the general benefit of its Creditors, under the provisions of "The Assignment Act," being Chapter 6 of the Statutes of Alberta, 1907.

The Creditors are notified to meet at the office of The Trusts and Guarantee Company, Limited, in the City of Calgary, at the hour of 3 o'clock in the afternoon on Tuesday, the 18th day of November, 1913, for the purpose of receiving a statement of the affairs of the said insolvent company, for the appointment of inspectors, and the giving of directions with reference to the disposal of the estate.

Every creditor or person claiming to be entitled to rank on the estate assigned is required to deliver or send post paid to the said Company, on or before the 4th day of December, 1913, particulars of his claim, verified by affidavit, and such vouchers as the case admits of, and stating whether he holds any security for his claim or any part thereof, and putting a specified value on such security (if any), in accordance with the said Act.

And notice is further given, that after the said 4th day of December, 1913, the said Company will proceed to distribute the estate of the said insolvent under the said Act, having regard only to the claims of which it shall have notice at such time of distribution.

Dated at Calgary, this 4th day of November, 1913.

THE TRUSTS AND GUARANTEE COMPANY, LIMITED.

Official Assignee.

H. A. HOWARD, Manager.

MACDONALD & McBRIDE, Solicitors for the said Company.

## Synopsis of Canadian Northwest

### Homestead Regulation

Any person who is the sole head of a family or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Subagency for the district. Entry by proxy may be made at any agency, on certain conditions by father, mother, son, daughter, brother or sister of intending homesteader.

Duties.—Six months' residence upon cultivation of the land in each of three years. A homesteader may live within one mile of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father,

mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price \$200 per acre.

Duties.—Must reside on the homestead or pre-empted site within six months from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may enter for a purchased homestead in certain districts. Price \$300 per acre. Duties.—Must reside six months from each of three years, cultivate fifty acres and erect a house worth \$300.00.

W. W. COBY,

Deputy of the Minister of the Interior

## GENIUS OF A PAINTER

Da Vinci's Prayer and Triumph of Art  
While still a pupil

It is told of Leonardo da Vinci that while still a pupil, before his great burst into brilliancy, he received a special inspiration in this way:  
His old and famous master, because of his growing infirmities of age felt obliged to give up his own work and one day had to visit the studio for a picture which he had begun.

The young man had such reverence for his master, that he felt almost as if he would not accept any excuse, but persisted in his command, saying simply: Do your best.

When the painting was finished the old master was carried into the studio to pass judgment on the result. His eyes rested on a triumph of art, throwing his arms around the young artist he exclaimed: My son, I paint no more.

## DOCTORS CONDEMN OILY LINIMENTS

Public are Warned Against Strong Smelling, Oily Liniments Containing Harmful Acids and Ammonia

Many people have clung to the old-fashioned notion that a thick, greasy liniment is the best kind. Doctors, however, have done an enormous amount of work in the last few years to find out the truth about these so-called liniments.

For the moment they may cause a warm sensation when first applied, but their continued use never cures rheumatism, and only deteriorates the skin, sets up indigestion, and causes endless trouble.

When the doctor warns you to quit using a white, oily liniment—do so. He knows that a thick liniment can't penetrate, can't stick through the pores, and reach the seat of the pain.

When asked his opinion a few days ago, an important physician stated that he considered a strong, penetrating, non-staining liniment, such as "Nerviline," to be superior to any of the white ammoniac liniments.

In his twenty-five years of practice he had witnessed cases of rheumatism, sciatica, and lumbago that simply would not respond to ordinary treatment, but Nerviline cured them. The same physician also spoke of the great advantages of keeping a group of athletes in the house; because of the use of Nerviline in the house; because of the use of Nerviline in the house; because of the use of Nerviline in the house.

cramps, diarrhoea, stomach disorders, caries, toothache, headache, and such minor ailments. Nerviline is a first-class cure. There is no such ache or pain, internal or external, that Nerviline won't cure. In thousands of homes no other liniment is used. Nerviline is used. Nerviline is used. Nerviline is used.

continued success in the endorsement of the profession are proof of Nerviline is the liniment for the home.

AL is Well!  
Your letter came. Glad you bought a team of horses. Hilda is sick. She has diptheria, and she will die.

Clark died this eve. She had it too. We are quarantined. Five of Mr. Her's family have got it. My wife is sick. She hasn't got it. If this thing gets worse we may have to get a doctor. Thank you for budging me. Everything O.K.

A Safe Prediction  
Well, what is your opinion of the political outlook now?

My opinion of it is that there is going to be a lot of usages. Everybody is elected and the man who is chosen will not succeed in satisfying everybody who votes for him.

CRIED NIGHT AND DAY  
Mrs. Adelaide Ouellette, St. Bruno, Que., says: "My little boy cried night and day from stomach trouble and nothing seemed to help him till I got a box of Baby's Own Tablets. They soon made him well and happy again. I have also found them valuable at teething time." Thousand of other mothers have the same praise to offer not only for stomach trouble and teething troubles but for all the little ills of little ones. The Tablets are sold by medicine dealers or by mail at six cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Who Let the Auto  
Among the articles left for forgetful passengers on the South Eastern Railway was a motor car, forty bicycle, 3,000 umbrellas, four sewing machines, carved stone idols, and other theatrical scenery.

## A FAMOUS WOMAN DETECTIVE

Mrs. Goodwin of the New York Police  
A Real Sherlock Holmes

In the Woman's Home Companion appears the following account of Mrs. Isabella Goodwin, the famous detective in New York city in connection with the police department.

Here is a real Sherlock Holmes who has been instrumental in the capture of hundreds of criminals and the detection of a single pipe of tobacco.

She is Mrs. Isabella Goodwin, police detective, who has been instrumental in the capture of hundreds of criminals and the detection of a single pipe of tobacco.

of the first rank on the New York city force with a salary of \$2,500 a year. Her occupation of her service is procuring the capture of the taxicab bandits whose reckless exploits had started the city.

Mrs. Goodwin is a widow, forty-seven years old, the mother of three children, and her home life is as peacefully busy as that of any village housekeeper. Since the death of her husband, a roadman on the police force, fifteen years ago, until her recent promotion Mrs. Goodwin served as a police major.

Incidentally her duties as a detective in quietly gathering evidence against hundreds of dangerous franks and crooks.

Her elder son is a detective of the first grade, her sister is a department store detective, and her daughter also has already manifested ability in detective work.

When the taxicab bandits were doing an enormous amount of business, had seemingly baffled the police Mrs. Goodwin was enlisted in the case.

She was assigned to a detective in the office of the landlady of a boarding house frequented by friends of the robbers she was enabled gradually to pick up information that was invaluable to the authorities in running down the criminals.

It was then that Mrs. Goodwin, standing as a detective, with her fifteen years of service she was ready to do an enormous amount of even more valuable though less sensational work in obtaining evidence.

against over 500 gang and winders—astrologers, palmists, fortune tellers and crystal gazers, psychics, trance mediums, Hindu mystics, quack doctors and surgeons and others that in the large city prey upon foolish people, almost unnumbered because of the difficulty of proving that they actually violate the law.

Patriotism is Remembered  
It was the breaking of a teapot in the American invasion of one hundred years ago that gave Ellerbeck Avenue, Toronto, its name.

John Playter, grandfather of John Rydall, lived at the time of the American occupation of York, on the east bank of the River Don, after the evacuation of York by the British troops. The American commander, General John Playter, had the custody of some valuable documents and a large quantity of silver money.

Playter buried the treasure left in his charge.

An officer and some men were detailed by the commander to go to the Playter home and take charge of these valuables. They found Mrs. Playter engaged in preparing the supper. The men demanded to know the whereabouts of the treasures.

Mrs. Playter remained silent and pertinently refused to divulge the spot where they were buried.

In a moment of rage the officer whipped out his sword and floundered it, knocking over a teapot.

He left in a hurry, saying that the woman was unwoman.

When a street was cut close to the corner where the teapot was in the incident of the teapot was remembered and the road was named Ellerbeck.

The woman whose firmness had defeated a detail of soldiers one hundred years before.

Jalisco Did the Trick  
Albert J. Beveridge, America's best dressed politician, said in Chicago of a corrupt boss.

He's a very virtuous—oh, very virtuous. A millionaire once went to him and said:

I want to get in the senate. Will you sell me your support?

No, sir, the town answered, striking the millionaire up the chest. No, sir, I am a freeborn American citizen, and I will sell my support to no one.

But said the millionaire blandly as he drew out his check book and counted the money he put upon them. It stands pre-empted for this purpose, and athletes who for years have been using it can testify to its value as a lubricant.

Southern Hospitality  
I had been driving all day in a remote part of southern Georgia and at nightfall stopped at a cabin occupied by one man. He was very kind and asked me to spend the night with him. When we sat down to supper I was somewhat disturbed to observe that the meal consisted of a single large dish of potatoes. Without apology the man, with a wave of his hand toward the dish, said in a loud, hearty voice:

Stranger, take one.

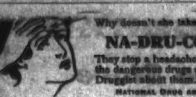

He raised a moment and continued in a still louder tone:

Stranger, take two.

He raised a moment and then even louder and more earnestly:

Stranger, take mighty near all of them.

Largest Tree Trunk  
Said to be the largest tree trunk in the world is that of a wild tree in Jilila, Mexico, which measures 145 feet in girth.

## Fish in the Sea of Galilee

Bible students may be interested to know that there is still good fishing in the sea of Galilee. Dr. Ernest W. Gurney Masterman, who has practiced medicine in Galilee, made a special study of fishes found there and in a recent book says that he found forty-three varieties, twice as many as can be found in the British lakes. The fishermen are taxed a fifth of the value of the fish caught, the revenue being partly to the king and partly to a pasha in Damascus.

Mirand's Liniments Cures Burns, Etc.

## Deserves no Credit

When a man can do a thing that you can't observe the philosopher's boarder, you generally explain it on the theory that it's nothing, for him to be proud of—he's merely gifted in that direction. Can I have another cup of coffee, Mrs. Irons?

## What They Do With Wood in Germany

In Germany, says the Scientific American, wood is expensive to be burned, and it is made into artificial silk worth \$2 a pound and bristles worth \$4 a pound, into paper, yarn, rayon, carpet, canvas and so on. From sawdust parquetry flooring is made. The materials for this may be bought by the pound and then mixed so that the householder can lay his own hardwood floors according to his individual taste and idiosyncrasy.

## Mirand's Liniment Relieves Neuralgia

Why George Explored  
I never knew that George had such a frightful temper.

How did you discover that he has one?

He took me to a baseball game, and when we asked him why they didn't make the bats square and the diamond round the language he used was terrible.

## A Bourgeois Tale

The following story is told by the Main, says the Observer—A lunatic was being questioned by a doctor.

"Tell me, my friend, asked the medical man, did the officers and men of the State Infantry?"

"Thanks, doctor, not badly. How did they treat you?"

And what interested you chiefly down there?"

Oh, certainly the frequent visits of an old chap who came and sat down in my cell, put on his eyeglasses and asked me the most idiotic questions. Ever since I recall, he wrote down in a little notebook. Of course the poor fellow was insane.

The visit, was M. Paul Bourget.

## Increase of Militia

The militia is becoming more popular in Canada. Figures compiled by the Department of Militia and Defence show that the number of the active militia today stands at approximately 75,000 officers and men.

increase of \$500 in a year.

Fishermen—Here comes another good fish tale. The story of the fisherman who caught a monster fish.

What's the meaning of it? Well, I can't tell you. It's a terrible tale, and should die.
